Six Panel Printing Explained...

How do you check that an ID card is official and printed by your staff? No other system on the market allows you to print personalised information pertinent to the card bearer in secure UV covert ink. Virtually invisible to the naked eye the UV printed layer can be checked using the supplied **Smart® UV Key Ring Torch** supplied free with each system!

Smart Printer Upgrades

Ethernet Connectivity	Add £194.00
Magstripe Card Encoder	Add £215.00
Mifare / iClass Card Encoder	Add £257.00
Smart Card Encoder	Add £257.00
Rotator for Dual Sided Printing	Add £274.00

Annual Printer Hot Swap

Add £195.00

How would you be affected if you were without your card printer for a week? In the unlikely event that your printer fails the printer would be fixed by us under warranty however this can take a number of days to identify and rectify the problem. Customers with Annual Printer Hot-Swap Support benefit from **free telephone support** for their printer and a **next day replacement printer** to use whilst your printer is being repaired. Add Hot-Swap Printer Support to your order for peace of mind and guaranteed card production.

“...very impressed not only with the speed of the printer but the ease of use of the software, I'm impressed with the ease of ordering and the speed of delivery – many thanks!!” Krysz Glinski

Learn more about the Software...

Bundled Value ID System Software **ImageBase Lite**

Included with the Value ID System is the award winning ImageBase Lite ID card software. Designed to be simple to use yet powerful enough to handle any ID, Loyalty, Discount, Membership or Exhibition card application. It eliminates double data entry by connecting easily to existing databases, saves users time with batch print functionality and quick-search for re-prints and adds security with the unique ability to print variable UV information (when used with Smart printer only) to the cards.

ImageBase Lite has all the functionality of the Pro version but is limited to 100 database records. Should your organisations requirements exceed this the upgrade to ImageBase Pro is simple, cost effective and enables you to use existing databases created in the Lite version.

Install and start printing in minutes! Setup wizard, full colour manual with screen shot illustrations and easy to follow instructions will have you issuing staff identification cards or membership cards within minutes of downloading the software!

Onsite Installation & Training

Add £395.00

For just £395.00 a friendly engineer can attend your site (anywhere on mainland UK) and show you and your colleagues how to get the most out of the Value ID System. The engineer will save you time and money by showing you the fastest way to produce staff ID cards, car-park passes, business cards or visitor passes all using the Value ID System. Whilst on-site they will install the printer, install the software, configure the database and card designs and train you and your colleagues - no jargon and all in the comfort of your own offices!!! **Special Offer! Onsite Installation & Training only £ 195 when purchased in conjunction with annual software support and printer Hot-Swap support.**

Offsite Installation & Training

Add £50.00

For just £50.00 the same service as detailed above can be executed remotely via the internet.

Special Offer! Offsite Installation & Training FREE with annual support contract £95, see below.

Annual Software Support

Add £95.00

Need to amend a card design or had a request to add a field in the databases? Need help with software shortcuts to save time? Struggling to encode your smart card or can't connect to your personnel database? Simply pick up the phone and call our friendly support team - we have no limits to the number of calls or call lengths and, with your permission, we can even take control of your ImageBase remotely and do it for you while you enjoy your lunch! All for just £95.00 for 12 months!!!

Software support customers benefit from **FREE** updates to ensure they have the latest version of our award winning ImageBase software.

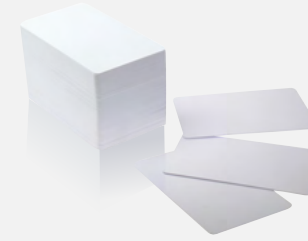

“ I've started working with the imagebase software and value ID Card System today and I'm really impressed with it, thank you for your help arranging this. ” Clive Deacon
